

Voltage
110V

Description
Mouth-blown in Murano, Italy. Signed "Oggetti." The glassblower applies a wrap over a gather of glass and then pulls the undulating pattern. A contrasting rim is created with a bead of glass. Silver leaf is then applied to create iridescence. Visible hardware is satin nickel or dark bronze.

Additional Information
No two shades are exactly alike. There will always be variations, which are typical of a handmade product and contribute to its beauty.
